

Commissioners' Chambers RFI Questions and Answers

1. Can your audio teleconference system take phone calls now, or is this a new upgrade? This is not a capability that the system already has. We do have a dial-in number for Microsoft Teams but would like for the capability to have an IP phone on the system.
2. Do we need to include NC Sales tax? You may add NC Sales tax. We are not tax exempt but do get reimbursed for the NC sales tax we pay.
3. Does your current Projector, 90" LCD display and all 13 local video monitors have an HDMI or DVI input so we can reuse these monitors? The LCD display has HDMI and the 13 local monitors have VGA and Display Port. From the logo on the projector, it appears that it has displayport and HDMI capability.
4. Do you have any construction drawings you can share? Yes, we will provide drawings early this week.
5. Do you have the last set of Audio Visual as built drawings? No, unfortunately we do not have much documentation from the current system.
6. Do you want to keep using the VCR and DVD player? Yes, It would be useful to have one 'generic' input to allow for legacy devices like these.
7. How many video outputs does the Deputy PC have? This laptop currently has VGA and HDMI out.

8. How many total Laptops do you use in a meeting that need to be presented, is it just the podium laptop? We usually only have the need for one laptop to present at a time, but the podium, and each pop up 'pod' has the capability to be used as an input to present. Wireless can be used to facilitate this if designed to be secure (not allowing audience to automatically connect and display during a meeting)
9. How many touch panels to you use now? Currently, there are two iPads and one touch screen monitor, located in the rear AV room.
10. How many touch panels are desired? At least the same amount (3) for redundancy.
11. Are you happy with your audio system now, can everyone hear the commissioners and side table mics? Yes. Occasionally, a mic auto will cut in and out. The system probably needs to be gone through and tuned accordingly.
